

Spacer

Spacer for threading onto PE foam bolts after the front plate has been installed against the foam. The spacer is followed by the reinforcing mesh and reinforcement fitting and provides a 25 mm space between the PE foam and the reinforcing mesh to ensure mesh being embedded in sprayed concrete.

Stock programme:

Spacer M16/M20/300/25

6 packs of approx. 165 pcs./approx. 1000 per pallet.

Technical information:

Material: Plastic, orange HDPE
