

Tear indicator

**Description:**

Plastic angle screws into PE foam to provide a guide to shrinkage in the concrete.

One side has regular slits to allow installation on curved surfaces without deforming the plastic. Between the tear indicator and PE foam, a sheet is laid as per specifications. The sheet or other covering must not be so thick that it prevents the clamp screws (L=35 mm) from gripping properly.

Material:

Plastic, black HD PE

Drawing: PTC-084-1

Drawing: PTC-084-2 Type 1 for fire tape

Option:

Tear indicator can be delivered with fire tape installed.

Ordered separately.

Stock programme:

75x60x3000

Accessories:

Clamp screw L=35 mm, fire tape
